EDUCATION

University of Southern California

Bachelor of Science in Computer Science and Business Administration

Aug 2023 – May 2027

Los Angeles, CA

EXPERIENCE

AI Agent Engineer Intern

Scowtt

May 2026 – Present

Kirkland, WA

- Developed a Slack-native AI onboarding agent integrated with Jira, Confluence, and other enterprise tools using LangGraph, Temporal, and OpenAI APIs
- Built context-aware automation pipelines to auto-generate and assign Jira tickets, handle client status queries, and synchronize updates across platforms, eliminating about 10 hours/week of work
- Leveraged conversational AI and workflow orchestration to streamline the full onboarding lifecycle, improving cross-team delivery speed by about 30% and reducing operational overhead

Undergraduate Research Fellow

University of Southern California

Sep 2025 – May 2026

Los Angeles, CA

- Spearheaded research on LLM Personalization, leveraging persona-prompting techniques to model heterogeneous human attitudes toward sensitive online content
- Architected a high-performance simulation framework using vLLM and HuggingFace to scale persona-based toxicity labeling across datasets of thousands of entries

Associate Software Developer Intern

Google

May 2025 – Aug 2025

Sunnyvale, CA

- Co-developed client-facing AI-powered dashboard by coordinating frontend implementation, API integrations, and security requirements, improving audit remediation workflows for clients
- Spearheaded customer discovery efforts by leading user interviews, translated insights into intuitive UI Figma designs, and delivered responsive frontend implementation
- Facilitated cross-functional design workshop for **10+** Arcto team members, establishing user-centered design principles, enhancing client needs assessment and product development processes

PROJECTS

FCCW CRM | *Product Management, Agile, Cross-Functional Leadership*

Sep 2025 – Present

- Led end-to-end CRM redesign for the Feminist Center for Creative Work (FCCW), owning the full product lifecycle from discovery and scoping through delivery across a year-long timeline
- Translated complex stakeholder needs into a structured roadmap, defining feature requirements and prioritizing scope to align business goals with technical constraints
- Directed a cross-functional team of nine developers and two designers, facilitating sprint planning, unblocking execution, and ensuring high-fidelity implementation of product requirements

Lumen | *Vite, Python, SupaBase, Tailwind CSS, OpenAI API*

Oct 2024 – Dec 2024

- Led development of Lumen, collaborating with cross-functional team to transform scattered social media feedback into actionable insights - won **Best Demo Award** at entrepreneurship showcase
- Engineered automated web-scraping system to aggregate comments from Instagram, X, and app stores, implementing intelligent filtering and translation - saves companies **2+ hours** of daily work
- Built responsive frontend interface from designer specifications and integrated with web-scraping backend, resulting in successful adoption by three companies including one with **3M+** active users

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, TypeScript, JavaScript, HTML, CSS

Frameworks: React, Vue.js, Flask, Swift, WordPress, TensorFlow, FastAPI, Vite

Developer Tools: Git, Github, Docker, XCode, Google Cloud Platform, VS Code, AWS, Autodesk Inventor

Libraries: Pandas, NumPy, TensorFlow, Keras, Scikit-learn
